

To celebrate our 10th anniversary, Sustainable Path Foundation is introducing **The Power of 10** and two exciting new efforts: **Sustainability Trailblazers** and **Pass It Forward**.

The Power of 10 is a well-known mathematical notation that can easily be applied to our everyday lives. At Sustainable Path Foundation, it explains how a small group of passionate people came together and built an organization that's invested more than \$1,000,000 in our community – and has a goal of increasing that impact ten-fold. Sustainable Path is thrilled to celebrate ten years of impact, ten years of group philanthropy, and ten years of whole-systems thinking this year, and we look forward to doing so with YOU!

Sustainability Trailblazers is an opportunity for us to recognize sustainability game-changers in our region. We'll select ten movers and shakers who've made a significant impact improving the health of our region and highlight their good work on our website, Facebook, and Twitter.

Through Pass It Forward, Sustainable Path will acknowledge one individual who exemplifies our mission and values. We'll donate \$1,000 ($\10^3) to the nonprofit of that person's choice, and he or she will select the second recipient. We'll donate another \$1,000 to the nonprofit of the second recipient's choice, and he or she will select the third recipient. This will continue until we have ten Pass It Forward recipients and ten nonprofits that have received \$1,000 awards.

Both **Sustainability Trailblazers** and **Pass It Forward** will allow us to recognize individuals' incredible efforts to advance sustainability in our region. We're excited to get to know those people and the organizations they care about. We're also excited to help you get to know them too, so look for more information in the newsletter, on our website, and on our Facebook page in weeks to come!
